Therefore, the band centers of the $Ag_{S_{0.4}Ru_{0.6}}$ impure rutile phase are -0.26 eV and -0.46 eV, respectively. The magnitude of the impurity band of AgRu is smaller than that of rutile, and the negative band center is smaller than that in rutile. This suggests that the band center of the AgRu impurity band is closer to that of the surface of AgRu.  (a) [

As seen by the Mirror, the video shows an elderly man wearing a Gary Lineker shirt asking a hospital receptionist to help him 'live to 85' after he is hit by a bus. A nurse tells him that since he turned 85, the man is free to leave hospital. The woman in the video says: "Apparently you are now free to leave this hospital".
